

Corn Grain:
P1292AMX-R* (AMX,RR2)

CRM **112**

Silk CRM: 109
GDUs to Silk: 1360

Phy. CRM: 106
GDUs to Phy. Mat.: 2550

Maximizing Local Performance

Widely adapted with a strong combination of top-end yield potential and drought tolerance. Available in very limited quantities.

Management Comments

- Tall plant height but dependable roots and brittle stalk resistance provide solid season-long standability.
- Monitor stalks late season, especially in continuous corn and environments with heavy gray leaf spot and anthracnose pressure.
- Moderate test weight offers opportunities for food corn premiums.

Key Environments

Variable Yield EnvironmentInsufficient Data

Suitability

Late HarvestInsufficient Data
Corn After CornInsufficient Data
High ResidueSuitable
SilageInsufficient Data

[1]IMPORTANT: Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Positioning information is based upon historical observations and analysis of traits by Pioneer Agronomists and Research Managers. Trait scores are assigned by Pioneer Research Managers. Scores are based on period-of-years testing through 2010 harvest and were the latest available at time of printing. Some scores may change after 2011 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. Products within a family receive the same score unless observations indicate a significant difference. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Refer to www.pioneer.com/products or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer brand product.

TECHNOLOGY SEGMENT: AM1 - Optimum® AcreMax® 1 Insect Protection System with an integrated corn rootworm refuge solution. AMRW-R - Optimum® AcreMax® RW Rootworm Protection system with a single-bag integrated corn rootworm refuge solution. Do not spray with Ignite®/Liberty®. Not all seeds in the bag are tolerant to Ignite/Liberty herbicides. AM-R - Optimum® AcreMax® Insect Protection system. Contains a single-bag integrated refuge solution for above-ground insects. Do not spray with Ignite®/Liberty®. Not all seeds in the bag are tolerant to Ignite/Liberty herbicides. AMX-R - Optimum® AcreMax® Xtra Insect Protection system. Contains a single-bag integrated refuge solution for above- and below-ground insects. Do not spray with Ignite®/Liberty®. Not all seeds in the bag are tolerant to Ignite/Liberty herbicides. HX1 - Contains the Herculex® I Insect Protection trait for resistance to corn borer. HXRW - Contains the Herculex® RW Rootworm Protection trait. HXX - Herculex® XTRA contains both the Herculex I and Herculex RW genes. YGCB - Contains the YieldGard® Corn Borer gene. LL - Contains the LibertyLink® gene for resistance to Ignite® herbicide. RR2 - Contains the Roundup Ready® Corn 2 trait. YGCB,HX1,LL,RR2 (Optimum® Intrasect(TM)) - Contains the YieldGard® Corn Borer gene and Herculex® I gene for resistance to corn borer. YGCB,HXX,LL,RR2 (Optimum® Intrasect(TM) XTRA) - Contains the YieldGard® corn borer gene and the Herculex XTRA genes for resistance to corn borer and corn rootworm. Herculex® insect protection technology by Dow AgroSciences and Pioneer Hi-Bred. ® Herculex and the HX logo are registered trademarks of Dow AgroSciences LLC. ® YieldGard, the YieldGard Corn Borer Design and Roundup Ready are registered trademarks used under license from Monsanto Company.
