Maximizing Local Performance

High-yield potential; best adapted to soils with average and above average water-holding capacity.

Management Comments

- Moderate plant height with good stalk strength and average roots.
- Above average stress emergence for ability to emerge in high residue environments.
- Strong drought tolerance allows placement on most soils, but avoid use on very drought-prone soils.
- Carefully manage sulfonylurea (SU) herbicides.

Key Environments

Variable Yield Environment Highly Suitable

Suitability

Late Harvest Suitable
Corn After Corn Suitable
High Residue Highly Suitable
Silage Highly Suitable

Soils

Poorly Drained Soils Poor Suitability
Drought Prone Soils Highly Suitable
Early Planting/ Cold Soils Highly Suitable
High Organic Matter Well Drained Soils Insufficient Data
Irrigated Sands Suitable

Traits Scores for P1395AM1 (AM1,LL,RR2)

Characteristics Scores

Stalk Strength6
Root Strength5
Stress Emergence6
Staygreen8
Test Wt.5
Drought Tol.7
Mid-Season Brittle Stalk7

Diseases Scores

Gray Leaf Spot6
No. Leaf Blight5

Refuge

Refuge Type: Integrated Refuge
Refuge Percentage: 20%
Refuge Placement: Separate Refuge
For complete refuge deployment details, please refer to the appropriate Product Use Guide.

Market Segments

YFC: Yellow food corn
HAE: High Available Energy (Monogastric Feed)
HTF: High Total Fermentables (Dry-Grind Ethanol)

PIONEER® brand products are provided subject to the terms and conditions of purchase which are part of the labeling and purchase documents. Pioneer is a brand name; numbers identify products. ®, TM, SM Trademarks and service marks of Pioneer Hi-Bred. © 2011 PHIL.

[1]IMPORTANT: Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Positioning information is based upon historical observations and analysis of traits by Pioneer Agronomists and Research Managers. Trait scores are assigned by Pioneer Research Managers. Scores are based on period-of-years testing through 2010 harvest and were the latest available at time of printing. Some scores may change after 2011 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. Products within a family receive the same score unless observations indicate a significant difference. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Refer to www.pioneer.com/products or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer brand product.

TECHNOLOGY SEGMENT: AM1 - Optimum® AcreMax® 1 Insect Protection System with an integrated corn rootworm refuge solution. AMRW-R - Optimum® AcreMax® RW Rootworm Protection system with a single-bag integrated corn rootworm refuge solution. Do not spray with Ignite®/Liberty®. Not all seeds in the bag are tolerant to Ignite/Liberty herbicides. AM-R - Optimum® AcreMax® Insect Protection system. Contains a single-bag integrated refuge solution for above-ground insects. Do not spray with Ignite®/Liberty®. Not all seeds in the bag are tolerant to Ignite/Liberty herbicides. AMX-R - Optimum® AcreMax® Xtra Insect Protection system. Contains a single-bag integrated refuge solution for above- and below-ground insects. Do not spray with Ignite®/Liberty®. Not all seeds in the bag are tolerant to Ignite/Liberty herbicides. HX1 - Contains the Herculex® I Insect Protection trait for resistance to corn borer. HXRW - Contains the Herculex® RW Rootworm Protection trait. HXX - Herculex® XTRA contains both the Herculex I and Herculex RW genes. YGCB - Contains the YieldGard® Corn Borer gene. LL - Contains the LibertyLink® gene for resistance to Ignite® herbicide. RR2 - Contains the Roundup Ready® Corn 2 trait. YGCB,HX1,LL,RR2 (Optimum® Intrasect(TM)) - Contains the YieldGard® Corn Borer gene and Herculex® I gene for resistance to corn borer. YGCB,HXX,LL,RR2 (Optimum® Intrasect(TM) XTRA) - Contains the YieldGard® corn borer gene and the Herculex XTRA genes for resistance to corn borer and corn rootworm.
