## Corn Genetic Diversity

## How to Increase Yields and Stability

Planting a lineup of genetically diverse hybrids helps spread environmental risk and lets you plant the right hybrid for each acre

### Choose:

- Genetically diverse hybrids
- Hybrids that are unique
- Hybrids suited to each field
- Hybrids with different maturities

### Avoid:

- "Cookie cutter" or look-alike hybrids
- Closely related hybrids
- Same hybrids in different bags
- Hybrids with same maturity

Diverse hybrid ears

Look-alike hybrid ears

## Right Product. Right Acre.<sup>SM</sup>

Over 250 Pioneer® brand hybrids

Over 120 unique hybrid families

More diversity

More stable lineup

Check Variety Codes located on seed tag or bag

A grower was unaware he purchased the same hybrid from two different companies this year until he closely examined the bag tags. The variety, B0000168, is the same on both tags, even though the "brand" names (Dekalb® brand RX674VT3 and Crow's® brand 4354 VT3) are different.
